

CITY OF TAMARAC CODE § 10-186
for
PRIVATE CONCRETE DRIVEWAYS

1. Form over well-compacted soil with the area from the sidewalk to the street having 6" compacted sub grade. If no sidewalk is there, then the last 3' of the driveway to the street shall be 6" deep.
2. Concrete to be a minimum 3,000 P.S.I. at 28 days.
3. Nail section of 1x lumber on asphalt to insure finished drive will be $\frac{3}{4}$ " above roadway.
4. Call Building Department for inspection after formed and before pouring concrete.
5. All roots, sprinkler lines, etc. shall be removed from the concrete slab area before pouring.
