

Sunset Point Park Parking Lot Expansion

BEFORE

AFTER

BEFORE

AFTER

This is an in-house design project to provide approximately 20 additional parking spaces adjacent to the park. The parking lot will be constructed within the underutilized right-of-way, located east of the park. The bulk of the project has already been constructed with in-house forces with only the finished asphalt and concrete work being bid out through the City's bidding process. The contract for the finished work has been approved through City Commission. The final lift of asphalt is scheduled for the week of September 26, 2011, with final completion in October 2011.
