

Stormwater Pump Station Automatic Gates

Installation of automatic valves at the City's three Master Stormwater Pump Stations to prevent the undesired loss of surface water into the C-14 canal during drought situations. An Agreement with Inter-County Engineering, Inc. for the design and installation of the automatic valves has been executed and the Notice-To-Proceed was issued on October 25, 2010. Work is ongoing and scheduled for completion in November 2011.
